## TheraLift Hi-Lo Bariatric Rehab Therapy Tables

## CareLift Hi-Lo Bariatric Rehab Therapy Table

The **TheraLift and CareLift Hi-Lo Bariatric Rehab Therapy Tables** are heavy-duty clinical powerhouse engineered for the most demanding rehabilitation environments. The TheraLift's oversized platform serves as a versatile foundation for advanced gait training, neuro-rehabilitation, and bariatric mobilization, offering ample space for therapists to work directly on the mat with their patients. While, the CareLift's narrower 30-inch width platform with shelf allows therapists to maintain closer proximity to the patient, making it ideal for targeted manual therapy, orthopedic assessments, and precision mobilizations. Unlike standard tables, this series utilizes a specialized four-motor synchronous lifting system, ensuring the platform remains perfectly level and stable even under uneven weight distribution. This advanced engineering is paired with an open-base design, allowing for seamless integration with mobile patient sling lifts to facilitate safer transfers for both clinicians and patients.

Safety and durability serve as the core of the TheraLift and CareLift design, which features a reinforced frame capable of supporting an astonishing 1,500 lbs. capacity. The table is driven by four independent electric actuators for precision control and is anchored by durable, powder-coated black legs that provide an industrial-strength foundation. For maximum hygiene and patient comfort, the surface is wrapped in premium, moisture-resistant black PVC upholstery with seamless rounded safety corners. This high-performance equipment serves as a versatile medical asset, providing security in bariatric care, accessibility for pediatric therapy, and durability for sports medicine recovery.

## Features

**1500 lbs.**  
Weight Capacity

**Black**  
PVC Upholstery

### STABILITY

Adjustable metal leveling feet with non-slip rubber grips.

**ROUNDED CORNERS**  
Precision-contoured edges enhance patient safety.

### 4-Motor System

Utilizes four independent electric actuators that move in perfect unison.

**STORAGE SHELF**  
Included in the **CareLift Hi-Lo Rehab Therapy Table ONLY**

### Adjustable Height

Hands-free foot controller allows for smooth height adjustments.

### FOOT CONTROLLER

### Height

Maximum  
30"

Minimum  
20"
