Midnight Express

Built to keep up with the daily demands of athletic training and rehab, this **Taping Table** strikes the perfect balance of professional strength and everyday practicality. A solid oak frame reinforced with dependable hardware provides unwavering stability, while dense fire-retardant foam cushioning wrapped in durable Midnight Express upholstery delivers both comfort and resilience through taping, strapping, and prep work. The elevated working height helps reduce strain on staff, allowing trainers and therapists to stay focused on their athletes without unnecessary bending or fatigue.

From intense game-day prep to routine rehabilitation sessions, this table is designed to thrive in high-traffic environments. Stable footpads, a sleek lacquer finish, and a weight capacity of 380 lbs. ensure lasting performance, making it a trusted staple in sports programs, therapy centers, and training facilities where reliability matters most.

Features

Durable Frame: The solid oak frame provides long-lasting strength, making the table well-suited for demanding environments.

Supportive Cushioning: A cushioned padding with 2" foam delivers firm, reliable comfort for athletes during taping, strapping, and treatment.

Professional: The antimicrobial PVC upholstery offers a sleek appearance while resisting wear and allowing for easy cleaning between sessions.

Ergonomic: Standing 36" high, the elevated design reduces strain on trainers and therapists by minimizing bending and awkward positioning.

Stable: Reinforced hardware and sturdy footpads keep the table balanced and secure, even with heavy daily use.

High Capacity: With a weight limit of 380 lbs., the table safely accommodates a wide range of athletes and patients.

Low Maintenance: Easy-to-clean surfaces and corrosion-resistant components reduce upkeep, keeping facilities running smoothly.

Space-Saving: Its compact footprint fits seamlessly into crowded training rooms and rehab clinics while still providing ample working space.

Reliable Performance: The dependable construction ensures it can withstand the pace of busy athletic programs, rehab centers, and sports medicine facilities.

Optional: We offer three shelving options (sold separately) that provide streamlined access to essential medical supplies.

Practical: The paper roll dispenser and paper cutter (sold separately) allow for quick changing of the liner.
